

NAC Plus

Glutathione Booster
Detoxify Formula

DESCRIPTION

- Powerful Antioxidant and Free Radical Scavenger
- Regulates Supporting Antioxidant Production
- Supports Normal Detoxification
- Enhances the Immune System

Glutathione is a powerful antioxidant that fights aging, builds energy levels and works in two powerful ways; first, the liver uses it to remove energy-draining wastes from the body, and second, it protects cells against the free radicals that cause premature aging.

Glutathione plays a central protective role against the damaging effects of bacteria, viruses, pollutants and free radicals while detoxifying foreign chemical compounds and carcinogens. Without glutathione, other important antioxidants such as vitamins C and E cannot do their job adequately to protect your body against disease.

While ordinary glutathione supplements break down in the stomach, NAC Plus contains N-Acetyl Cysteine to help glutathione pass easily through the GI tract for complete absorption. There are also 11 vitamins and minerals and 6 antioxidants to strengthen NAC Plus' ability to fight toxins and aging. Plus, there's milk thistle for the extra liver support a busy lifestyle demands.

FUNCTIONS

Supplementation of NAC Plus can help increase glutathione content levels in the body. Glutathione is a powerful antioxidant which also aids in brain function, mental control and brain balance.

INDICATIONS

This product should not be used while pregnant or epileptic.

FORMULA

Each serving contains: 1 Capsule
Servings per container: 30

Vitamin C (Ascorbic Acid)	75mg
